

Wireless Internet Access

Monash Libraries offers free access to wireless internet (wifi) to authorised library members.

Adult library members, and those under the age of 18 who have parental consent, can register to use wifi. Once registered, you can connect to any wireless compatible device including laptops, smart phones and tablets.

How to connect

Nearly all laptops are wireless enabled and any smart phone or tablet will come with wifi connectivity. Your connection should be set to our signal: **MPLS Wifi**

Simply open your browser (you may need to attempt connection to a website) and the Wifi Conditions of Use will appear. Please read these conditions and enter your library card number.

Help

- Ensure wireless is enabled on your device. Laptops usually have a switch and mobile devices have a setting.
- Ensure you are properly logged out of any other wireless networks.
- Some security settings on your laptop may block access and will need adjusting in order to connect successfully.

- **Poor signal?** Try moving around the library as the strength may vary.
- **Browser error?** In Explorer click *Continue to this website*. In Firefox click *Accept this certificate*. You should then proceed to our login page.
- **Need to print?** Sorry, our wifi service is not connected to a printer, but you can save your work to a USB and print from a public access PC.
- **At Mulgrave?** Wifi is set to a different signal - ask staff for help.
- Your wifi account can be used simultaneously on up to **two** devices.
